OBJECTIVE

Computer Science and Engineering (Data Science) graduate with strong skills in full-stack development, Python, Flask, MERN, and database technologies. Seeking a software engineering role to apply my technical expertise and problem-solving abilities to build scalable, efficient, and impactful solutions.

EDUCATION

Sahyadri College of Engineering and Management

Bachelor of Engineering in Computer Science (Data Science), CGPA : 8.59

Adyar, Mangalore

Dec 2022 – May 2026

Viveka Pre University College

Science : PCMB, Percentage : 87.83%

Kota, Udupi

Sep 2020 – May 2022

Government High School

Percentage : 89.92%

Brahmavara, Udupi

Jun 2017 – Aug 2020

INTERNSHIP

Prinston Smart Engineers

Jan 2026 – May 2026

Full Stack Developer Intern

Bangalore

- Contributed to full-stack web application development by building responsive frontend components, integrating RESTful APIs, and implementing backend functionality using the MERN stack
- Collaborated on end-to-end application development, including frontend-backend integration, database operations, authentication, API testing, debugging, and feature implementation following structured software development practices

PROJECTS

Digital Beedi Branch Management System | *Python, Flask, Bootstrap, SQLite, JavaScript*

- Developed a Digital Beedi Branch Management System to automate worker attendance, production tracking, wage calculation, and inventory management
- Designed a simple, user-friendly interface for low-literacy users, improving operational accuracy, transparency, and management efficiency

Chinese Restaurant Website | *React, Material-UI, Express.js, Node.js, MongoDB*

- Developed a responsive Chinese Restaurant Website with modules for authentication, menu, cart, checkout, reservations, orders, reviews, and an admin dashboard
- Implemented backend APIs for user management, orders, reservations, and revenue tracking, ensuring secure authentication and seamless frontend-backend integration

Credit Card Fraud Detection | *HTML, CSS, Python, Flask, Machine Learning*

- Developed a Credit Card Fraud Detection system to identify fraudulent transactions from uploaded datasets using machine learning-based analysis
- Implemented data preprocessing, model training, and real-time prediction through a web interface, enabling users to upload transaction data and receive fraud detection results

TECHNICAL SKILLS

Programming Languages: Python, C, Java, JavaScript

Technologies: HTML, CSS, Bootstrap, React, Node.js, Express.js, Flask, Material-UI, MongoDB, SQLite, MySQL

Developer Tools: Git, VS Code, Thunder Client

Certification: Natural Language Processing Projects (Great Learning), JobReady Employability Skills (Wadhvani Foundation), Machine Learning Beginner (Infosys Springboard)

ADDITIONAL INFORMATION

Achievement: Secured Runner-Up at Techvision-2K25 for the Digital Beedi Branch Management System, recognized for its innovative automation, social impact, and efficient digital management.

Languages Known: Kannada, English, Hindi
